Junior QA Engineer

Summary

I have 4 more years of experience as a computer systems engineer, the last year in the Middle position. Have a good understanding of QA processes, requirements, methodology, testing types/approaches, etc. Creation of test documentation - test cases and test plans, which are confirmed by a theoretical and practical base. I have good communication and organizational skills. I am a positive person, proactive, responsible, and flexible. I have extensive experience in communicating with customers, users, and clients: the ability to learn quickly, and a constant desire to learn and develop.
I'm considering both remote and office work.

Technical skills

Test documentation
- Check-list
- Test case
- Test suite
- Test Summary Report
- Bug-report
- Values Analysis
- Equivalence Partitioning
- Decision table
- State-transition diagram
- Use-case diagram
- User Stories
- Acceptance Criteria
- Traceability Matrix

Tools and Technologies
